## **Pediatric Blood and Marrow Transplant Physician-Scientist**

The Aflac Cancer Center and Blood Disorders Service at Children's Healthcare of Atlanta is seeking a BMT physician-scientist to join our growing program. The candidate will serve as an Assistant or Associate Professor at Emory University School of Medicine with a concurrent faculty position at one of the five largest childhood cancer programs in the country. The successful candidate will spend a majority of his or her time directing a translational research program, but will also actively participate in the Children's BMT clinical mission.

A vibrant institution with highly collaborative basic and translational research programs in transplant immunology and gene therapy the Aflac Cancer Center has a strong institutional translational research program and is an active member of the Children's Oncology Group and The Pediatric Blood and Marrow Transplant Consortium.

Blood and Marrow Transplantation in the Aflac Cancer Center and Blood Disorders Service is a FACT accredited program performing more than 60 transplants per year. The team performs autologous, related and unrelated donor, partially matched donor and umbilical cord transplants. Areas of specialty include transplantation for sickle cell disease, development of novel transplant tolerance strategies, and sequential peripheral blood stem cell transplants for high risk solid tumors. The Aflac Cancer Center and Blood Disorders Service provides care to over 370 new cancer patients, over 1800 sickle cell patients per year in a highly collaborative atmosphere.

Candidates must be board certified in Pediatrics, board certified/eligible in Pediatric Hematology/Oncology, eligible for medical licensure in Georgia, and US citizens or permanent residents. The successful candidate will be an MD/PhD or MD and will have an active research program focused on translational issues related to BMT or GvHD. We are especially interested in candidates whose research is directed at understanding the immune mechanisms of transplant rejection or GvHD.
