

Pediatric Infectious Diseases is Recruiting Healthy Children for Research!

What's the research for? We are collecting blood from healthy children (0-2) years of age for basic science studies. Scientists working in the Emory Children's Center will use it to study how the immune system works, how infections develop, and how vaccines and medicines can prevent and treat illnesses.

What's involved in this study?

- This is a blood draw study only:
 - Amount of blood to be drawn will be based on child's weight
- 15 minutes visits at the Emory Children's Center
- Single or multiple blood draw opportunities depending on blood draw safety parameters

Will I be compensated? Participants will receive \$50 per visit

I'm in! What should I do now? Please email

ecc.vaccine@emory.edu or call **404-727-4044**. Thanks for your interest!
