RESEARCH CORES

Research Snapshot
December 2021
**Research Resources:**
The resources to the right are available to all investigators affiliated with Children’s Healthcare of Atlanta (CHOA), including medical staff, Emory Department of Pediatrics (DOP) faculty and staff, and those outside of the DOP and CHOA who are members of our research centers. We encourage involvement of all those interested in research throughout our system and provide this as a guide to resources along with our research website www.pedsresearch.org. Our goals are to build infrastructure and programs that serve a broad community of scientists and clinicians engaged in pediatric research and provide training in grant writing and grant opportunities that enhance our extramural funding for all child health investigators affiliated with Children’s Healthcare of Atlanta. For suggestions and comments on any of the initiatives and resources, please contact Clinton H. Joiner, MD, PhD Clinton.joiner@emory.edu or Stacy Heilman, PhD stacy.Heilman@emory.edu

### Grant and Manuscript Support
- **Stacy Heilman, PhD**
  Director, Research Operations 404-727-4819
  stacy.heilman@emory.edu
  - Assistance with finding grant opportunities and connecting to collaborators
  - Core laboratory assistance, supervision

### Grants & Manuscript Editing
- Prioritized for extramural funding opportunities, program projects
- Experienced at program project management, grant and scientific paper editing
- Request form on pedsresearch.org; send to Stacy Heilman

### Biostatistics Core
**Shasha Bai, PhD**, Director
**Scott Gillespie, MS, MSPH**, Asst Director
- **Rohali Keesari, PharmD, MPH**
- **Adrianna Westbrook, MPH**
- **Yijin Xiang, MPH**

Priorities: analysis for grant applications and Publications

### Clinical studies/coordinators
- **CHOA Clinical Research Administration**
  - **Hema Mody** hema.mody@choa.org (as of 1/18/22)
  - **Stephanie Meinsner** stephanie.meinsner@choa.org 404-785-6453
  - **Manager, Egleston campus**: Rebecca Cleeton 404-785-0109 rebecca.cleeton@choa.org
  - **Manager, Hughes Spalding/Scottish Rite campuses**: Marco Benoit 404-785-2269 (Macarthur.Benoit@choa.org)
  - **Lead Research Nurse, Pediatric Research Center (PCRU/CAP Building)**: Cheryl Stone, RN cherryl.stone@choa.org 404-785-0400-main number

### Pediatric Clinical Research Unit (PCRU)– A six-bed outpatient research unit/ A two-bed inpatient research unit/ A four-bed inpatient research unit/ A core research lab/ A research pharmacy/ Bionutrition services/ Nursing Services including, but limited to: Medication administration including investigational drugs; I.V. access and port access; I.V. infusions; Routine and complex vital sign monitoring; Phlebotomy; Timed specimen collections such as PK trials and oral glucose tolerance tests; Telemetry monitoring; For more information, please visit: [http://www.pedsresearch.org/research/support-services/dedicated-clinical-research-facilities](http://www.pedsresearch.org/research/support-services/dedicated-clinical-research-facilities)

### Laboratory Specimen Processing:
Clinical Laboratory at Egleston and Scottish Rite
- **Heather MacDonald, Manager**
  Advanced Diagnostics Laboratory 404-785-5766
  Heather.macdonald@choa.org or labresearchcoordinator@choa.org
  - Clinical trials specimen processing, shipping, limited storage
  - ACTSI processing lab
  - Laboratory inventory management system (LIMS) available

### Equipment Core:
- Biosafety cabinet, incubators, clinical centrifuge, real-time PCR machine, standard PCR machine, multilabel plate reader, gel documentation system on order
  Services: This core provides common equipment for investigator’s use, including access to benchtop space and hood space, centrifuges for clinical specimen processing

**Research Leadership Team (RLT) meetings:** Designed for central team to discuss detailed operations and issues. For more information, contact Stacy Heilman stacy.Heilman@emory.edu

**Research Advisory Council (RAC) meetings:** twice monthly; restricted to RAC membership, contact Clint Joiner, MD, PhD for inquiries or suggestions Clinton.joiner@emory.edu

**K club:** Monthly discussions/lectures for K award training, other grants training/education. Typically 2nd Monday, September to May, Contact Stacy Heilman Stacy.heilman@emory.edu for more information. *Sponsored by Departments of Pediatrics and Medicine, Georgia CTSA, CFAR and Winship Cancer Institute*

**Research Grand Rounds:** one Wednesday each month, Egleston, 8:00 AM Contact Barbara Kilbourne Barbara.Kilbourne@emory.edu

**Research Seminars:** Fridays (Zoom/Egleston Classrooms). Contact Barbara Kilbourne for suggestions or needs Barbara.Kilbourne@emory.edu

Invited speakers through seminar series sponsored by centers; contact Center Directors or Barbara Kilbourne at Barbara.Kilbourne@emory.edu if interested in upcoming events. Center Directors are listed on pedsresearch.org website.

| **Animal Physiology Core**    | Nitya Bakshi, MD                        | Ming Shen                      | • Small animal ventilator
• Cautery
• Temperature monitoring
• Anesthesia system
• Dissecting microscope
• Visualsonics Vevo 2100 High Frequency Ultrasound* | Emory-Children’s Center, 2nd Floor Lab | This core is a centralized resource specializing in survival surgery for rats and mice in addition to assistance with other USDA regulated animals such as rabbits, guinea pigs and piglets. The core director assists all investigators with development of IACUC protocols. Surgical services currently offered by the Core include pulmonary banding in rat and neonatal rabbit, aortic banding, myocardial infarction 5/6th nephrectomy for chronic kidney disease, liver-ischemia reperfusion and ultrasound guided injection ideally suited for targeted drug or cell therapy delivery. The Core also has available for use a Visualsonics Vevo 2100 High Frequency Ultrasound system that allows high resolution small animal ultrasound examinations for noninvasive measurement of in vivo structure and function. The Core Technical Director has been extensively trained in ultrasound techniques with many years’ experience thereby increasing reliability and reproducibility of imaging data. Studies can either be conducted in an assisted fashion or investigators can reserve the equipment and utilize their own laboratory personnel. |
| **Biomarkers Core**            | Lou Ann Brown, PhD                      | Frank Harris                   | Agilent gas chromatography/mass spectrometer and Waters high performance HPLC with fluorescence detector | Emory-Children’s Center, 3rd Floor Lab | This core analyzes markers of oxidative stress and markers of alcohol exposure. Speak to Scientific Director about other chromatography/mass spec assays available. |
| **Cardiovascular Imaging Core (CIRC)** | Ritu Sachdeva, MD                      | Joan Lipinski, RDCS, RDMS       | Echocardiograms
• Flow Doppler
• 3-D Imaging
• Upright Bicycle
• VO2 Analysis
• Electrocardiogram
• Cardiac MRI | Outpatient Cardiac Services, 2nd Floor, Tower 1 | This core provides non-invasive cardiac support for investigators involved in clinical research involving infants, children and adolescents. The CIRC has dedicated space, equipment and staff to provide you with quality cardiovascular imaging data that is collected in a meticulous, systematic, detail-oriented manner. Because of our unique set-up, we are able to utilize state-of-the-art imaging modalities not typically seen in the clinical setting. |
| **Flow Cytometry/Cell Sorting** | David Archer                            | Technical Director for Core: Aaron Rae | • BD FACS Canto II Flow Cytometer - Lab E-362, HSRB
• BD LSRII Flow Cytometer - Lab E-362, HSRB
• BD LSRII Flow Cytometer - Lab E-362A, HSRB
• BD FACS Aria II Cell Sorter - Lab E-362A, HSRB
• Imagestream X Mark II - Lab E-362, HSRB
• Luminex 100 Analyzer - Lab E-362, HSRB
• CTL-ImmunoSpot-S6 Micro Analyzer (ELISPOT Reader) - E-480, HSRB | Health Sciences Research Building, E362 | This core offers access to several state of the art analytical flow cytometers and Luminex as well as high-speed cell sorting. We also offer training as well as expert help to enable our users to improve the quality and scope of their research. The facility provides flow cytometric analyzers and Luminex for the following applications:
- Immunophenotyping
  • Cell Cycle
  • Ploidy
  • Mitochondrial Potential
- Apoptosis
- PhosFlow
- Live/Dead
- Cell Proliferation
- Oxidative Burst
- Cytokine levels in serum and plasma
- Gene and protein expression in cells and body fluids |

| **Integrated Cell Imaging Core**                            | Adam Marcus, PhD Director, ICI aimarcu@emory.edu  
Laura Fox-Goharioon Associate Director for Research Projects, ICI laura.fox-goharioon@emory.edu  
April Reedy April.reedy@emory.edu | The rates for the microscopes included in this effort can be found at: http://www.cores.emory.edu/ici/documents/ICI%20Fees-Pediatrics%2020171.pdf.  
Pediatric researchers will benefit from a 40% subsidy when using any of the ICI equipment and technologies. ICI also provides expert consultation, training, and assistance on all technologies. More information on the microscopes and services available, locations, and how to become a user is available at http://www.cores.emory.edu/eigc/ | A partnership facilitated by the Emory School of Medicine and includes the Pediatric Research Alliance Cellular Imaging Core along with other cellular imaging sites on campus including Winship Cancer Institute, Emory NINDS Neuroscience Core Facilities (ENNCF), and the Department of Physiology | This core provides training and access to advanced cellular imaging systems, including confocal and TIRF microscopy. For more information: http://www.pedsresearch.org/research/cores/integrated-cellular-imaging-core/overview/ |
| **Genetics/ Genomics Core**                                 | The Emory Integrated Genomics Core (EIGC): EIGC@emory.edu | The EIGC is a full-service genomics and computational facility offering Emory researchers the ability to use the latest technologies and methods of analysis in their research. We offer next-generation sequencing, high density microarray services, targeted enrichment, single nucleotide polymorphism (SNP) genotyping, and cutting-edge computational services built around our custom Galaxy server and Emory University's high performance computing and storage infrastructure. Please go to this link to learn more: Emory Integrated Genomics Core. |                                                                          |                                                                          |
| **Emory Genetics Laboratory (EGL)**                         | Emory Genetics Laboratory (EGL): dohinfo@emory.edu or domglab@emory.edu | Emory Genetics Laboratory (EGL) is a “one-stop shop” for genetic testing. Its molecular genetics, biochemical genetics, and cytogenetics laboratories are fully integrated and offer one of the most comprehensive test menus available – more than 900 genetic tests are available for clinicians and researchers. As part of Emory University School of Medicine, EGL remains on the forefront of the latest technologies, including exome sequencing, next generation sequencing, whole genomic and targeted microarrays, and more. ABMG-accredited laboratory directors and NSGC-certified laboratory genetic counselors are available to all ordering clinicians and researchers. For more information, please visit Emory Genetics Laboratory. |                                                                          |                                                                          |

</thead>
</table>
| Research Center Pilot Grants (including Emory & GA Tech based centers)              | $50,000 (some GA Tech are $60K) | 12 months    | Usually mid-winter; Emory-based are due roughly every other year and GA Tech-based offered every year | 1. Must include a member of the center and/or member of Children's medical staff  
2. GA Tech Pediatric Technology Center (PTC)--must also include member of GA Tech faculty | 1. Must provide annual report specifying related publications, grant applications submitted and extramural funding received.  
2. Must apply for extramural funding within one year of project conclusion date.                                                                 | [Link](http://www.pedsresearch.org/research/resources/funding/pilot-grant-programs) |

### Imlay Innovation Fund

Intended solely to support collaborative activities and pediatric innovation and discovery efforts between Georgia Tech and Children’s, focusing on practical steps that will lead to clinical impact as well as potential commercial opportunities.

Two types of projects are eligible for funding:

1. **Quick Wins: Quick Wins (QW)** allows Children’s clinicians and clinical administrative leaders to bring problems that impact care delivery to the attention of scientists and engineers at Georgia Tech to help develop innovative solutions. Successful projects have ranged from pediatric specific surgical device development in partnership with a surgeon and biomedical engineer to improvement of workflow in a busy outpatient clinic in partnership with physicians, clinical administrative leadership, architectural researchers, and industrial engineers. Quick Wins supports projects that can be accomplished in 12-18 months and can be quickly translated into practice. It is possible, but not guaranteed, that a Quick Wins award could help to position an investigator for a successful Innovation Investment application (described below) within the 2 years following the QW award. Quick Wins awards will be funded up to $125K.

2. **Innovation Investment**: Innovation Investment is intended to help bridge the funding gap that often blocks the next phase of implementation or commercialization after initial proof of concept. Innovation Investment awards should allow investigators to collect much-needed data, complete further proof-of-concept studies, or to produce prototypes for testing in order to effectively compete for extramural or investment funding. Innovation Investment projects will typically be funded for a one-year period. Applications for multi-year awards will be accepted only with prior approval, and can receive a total of no more than $250K. An important part of the proposal is a potential for commercialization and/or implementation, as well as potential to positively impact child health.
