

Research Opportunity!

EMORY
UNIVERSITY

We need healthy children to participate in an influenza vaccine research study

Help us determine how well an experimental high-dose quadrivalent influenza vaccine (QIV-HD) is tolerated in young children

Who: Healthy children ages 6 months – 35 months of age

What is involved?

- Participation will involve 2 – 3 visits to the vaccine clinic (on Emory's campus).
- If your child is able to join the study, receiving 1 or 2 doses of the high-dose flu vaccine (depending upon previous influenza vaccine history).
- We will also ask you to keep a diary card and will follow up with 2 – 3 phone calls.
- Participation will last approximately 6 – 7 months.

Compensation

- \$100 for each completed clinic visit.
- \$20 for scheduled phone calls.

**Interested: Please contact Emory Children's Center – Vaccine Research Clinic (ECC-VRC) for more information:
