

CF Data Science Workshop

October 6, 2026, 8 AM - 5 PM

National Center for Civil and Human Rights, Atlanta, Georgia

We are excited to welcome the cystic fibrosis research and care community to Atlanta for the North American Cystic Fibrosis Conference (NACFC). In addition to the conference, we are hosting a special event on **Tuesday, October 6th**.

This free, one-day workshop will explore how data science can advance cystic fibrosis research and care.

The program will highlight the Georgia CF Data Exchange & Warehouse (GACFDEW), a cloud-based platform that integrates longitudinal clinical, research, and biorepository data from people with CF across Georgia.

Sessions will cover:

- Data science needs and opportunities in CF
- Existing data resources and infrastructure
- Data integration, standardization, and ethics
- Real-world applications of data science

The workshop will conclude with a hands-on mini-hackathon using de-identified datasets.

Attendees will receive complimentary access to the National Center for Civil and Human Rights starting at 5 PM.
