CENTER FOR VIROSCIENCE AND CURE SEMINAR

MONDAY, OCT 19, 2026

10:00 AM ET

**Conference Room HSRB II, N600
(space limited) & Zoom (Registration
required)**

***“Utilizing nonhuman primate models for the study of
viral immunity and pathogenesis”***

Ben Burwitz, Ph.D.

**Associate Professor, Oregon National Primate Research Center at
Oregon Health & Science University**

Dr. Burwitz is an Associate Professor in the Oregon National Primate Research Center Division of Pathobiology & Immunology at Oregon Health & Science University. Dr. Burwitz received his Ph.D. in the Department of Cellular and Molecular Pathology at the University of Wisconsin-Madison. His research interests are focused on studying viral infections, specifically HIV, HBV, and flaviviruses (YFV and DENV) using non-human primate models. He collaborates with both academic institutions and biotech companies to refine and test both prophylactic and therapeutic interventions for infectious diseases that are of major concern to the human population.
